Billing PAs = people who issued invoices for the BU in the last 6 months (Water: Chaimae and Nouaman; AM: Abdelali and Malak). Mining is billed by the Fertilizers PA, JET by the Energy PA. JET unbilled is negative (credit notes) and shown as 0.

Proposed: FBP + Senior PA by BU cluster, billing PAs split by workload, same team

BUSINESS UNITS COVERED BY EACH SEAT · FOR INFORMATION · REVENUE, AR AND UNBILLED IN MMAD

Fertilizers & Chemicals
Revenue 798 · AR 3,220 · DSO 377 d
Billing/mo: 2M 77 · 6M 56 · unbilled 2,115

SP2M Ad Hoc Program

Advisory (incl. B&C)
Revenue 97 · AR 66 · DSO 181 d
Billing/mo: 2M 3 · 6M 5 · unbilled 23

Billing follows the workload
Projected load = 6-month run-rate + unbilled backlog over 12 months (slide 3). Fertilizers has the biggest future load: it gets the only addition (Karim Nseri), part of Jihane Maddi's time, and hands Mining to Ikram. Water adds Soufiane Echchih to billing.

Same people, few moves
Every PA keeps their BU. Mining moves from Saba to Ikram; Nouaman and Aboubakre (no invoice in 6 months) take a share of AM; Oumaima becomes Senior PA for Energy + JET and keeps billing both; Advisory pairs with B&I under Amine; Youssef Rhazi leaves the FBP map.

One owner for AR and reconciliation
Hajar Aanaya leaves the Advisory FBP role to become AR & Reconciliation Champion for all BUs, with a dotted line to every FBP. Today no one holds that role and each BU bills on its own.

Billing by BU: last 2, 4 and 6 months, projected load and PAs needed

How to read it

Invoices = distinct invoice numbers by invoice date, windows ending 31 Oct 2026 (register received 10 Nov). Green or red monthly figure: last 2 months more than 30% below or above the 6-month rate. Unbilled = status "Unbilled" lines in the register, HT. Backlog invoices = unbilled ÷ average invoice of the last 6 months.

Assumptions to challenge

The whole unbilled backlog is billed within 12 months (12 m). Capacity 60 invoices per PA per month: today Abdelali issues about 150, Saba 65, Malak 50, everyone else under 20. JET's unbilled is negative (credit notes), so no backlog. Project line counts in the register are not used: one project carries many lines.

What it says

Fertilizers is the pressure point: 2,100 MMAD unbilled in small tickets, roughly 1,200 invoices, so about 2.6 PAs against one today; hence the addition and the Mining hand-off. AM runs at 200 a month on two people and needs four. SP2M and Water carry huge unbilled amounts but large tickets, so the invoice count stays manageable. Group need is about 11 PAs against 14 seats proposed (12 people, two of them Senior PAs part-time).
