Current organisation: three teams, each BU runs its own billing

KPIs · GROUP AND BY BUSINESS UNIT

8,398 MMAD FY27 RFQ1 revenue

12,292 MMAD AR balance Oct-26 · DSO 282 d

8,173 MMAD Unbilled in the AR register (HT)

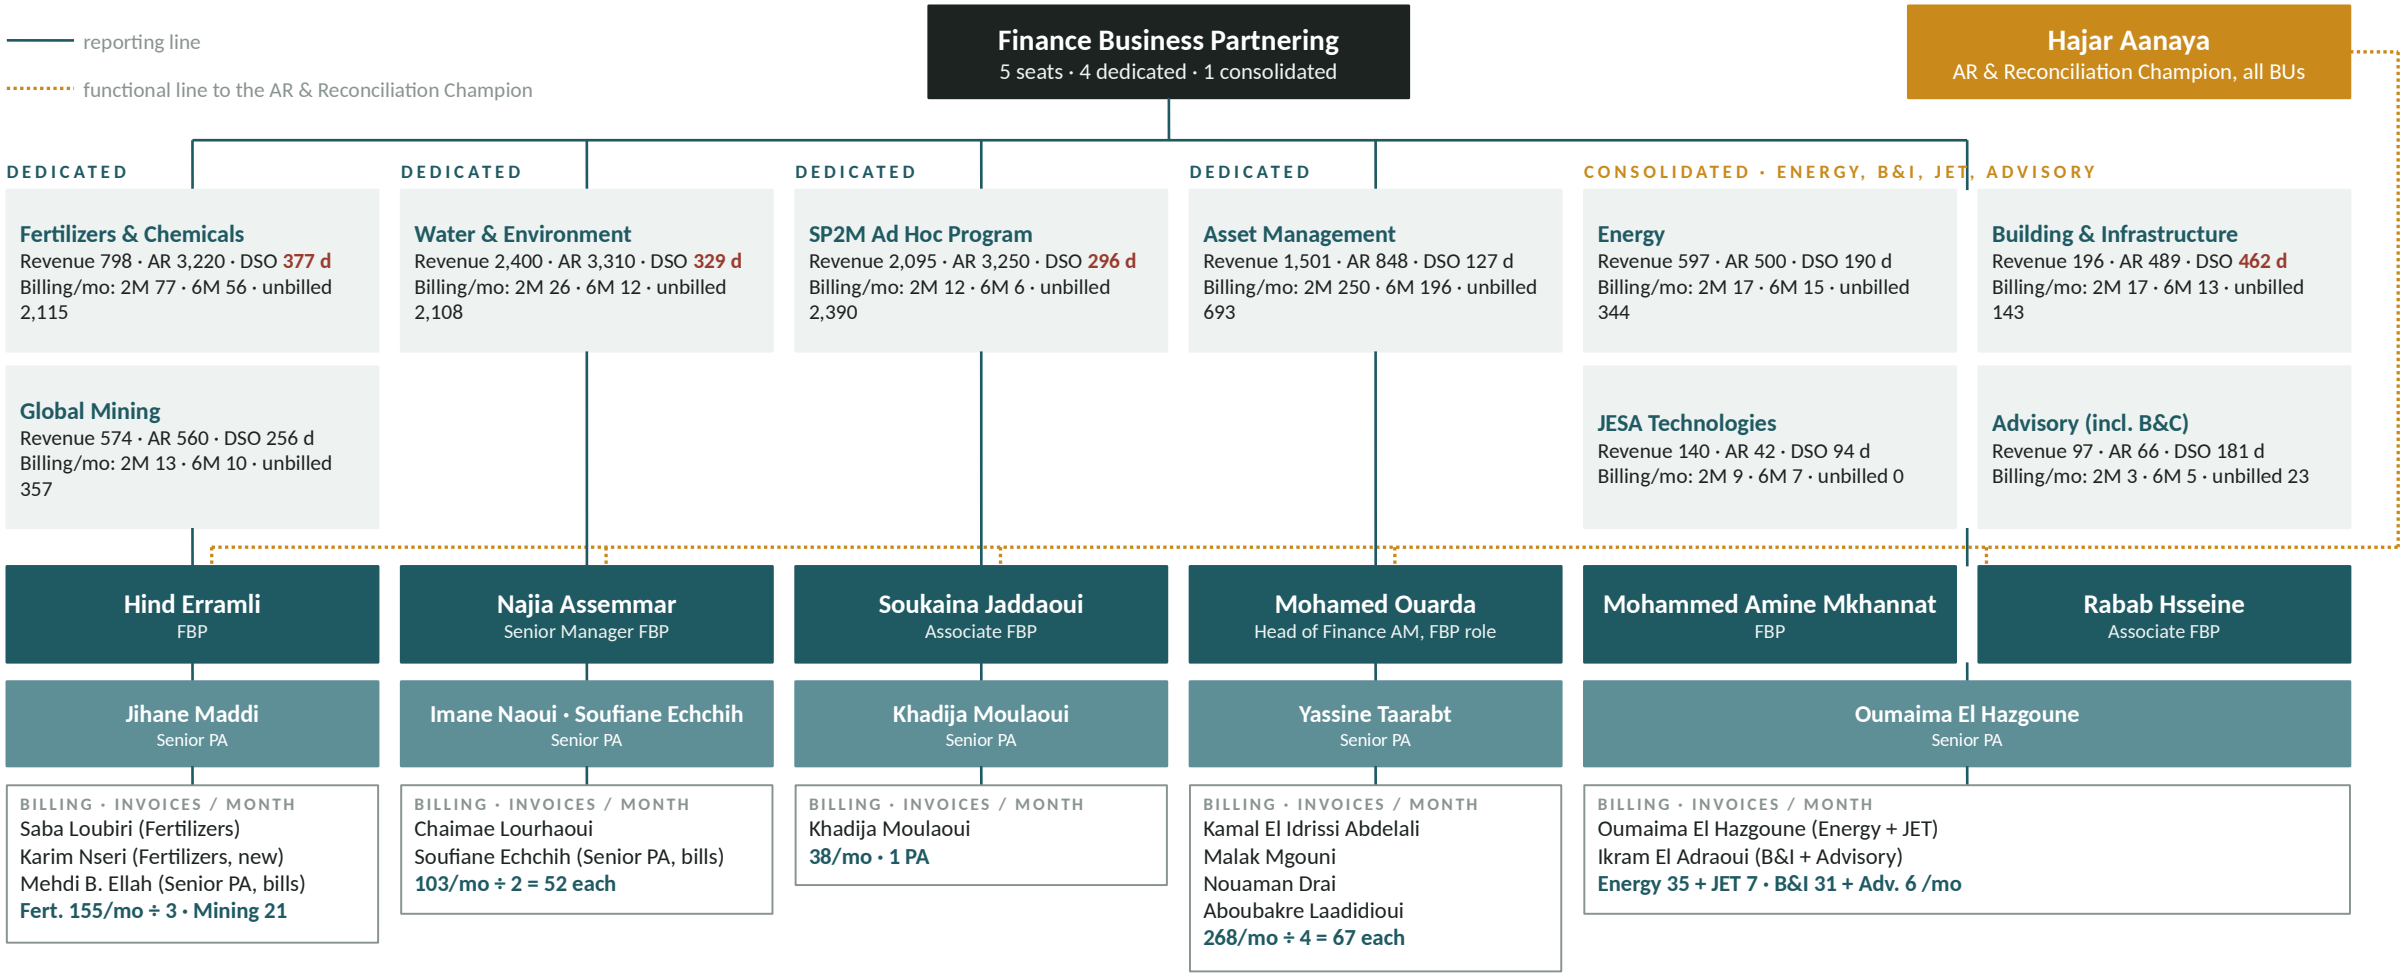

319 → 422 /month Invoices issued, last 6M → last 2M

8 people issued invoices in the last 6 months

Business Unit	Revenue	AR	DSO	Inv./mo 6M	Inv./mo 2M	Unbilled	Billing PAs	Avg/PA (6M)
Fertilizers & Chemicals	798	3,220	377	56	77	2,115	1	56
SP2M Ad Hoc Program	2,095	3,250	296	6	12	2,390	1	6
Water & Environment	2,400	3,310	329	12	26	2,108	2	6
Asset Management	1,501	848	127	196	250	693	2	98
Global Mining	574	560	256	10	13	357	none	–
Energy	597	500	190	15	17	344	1	15
Building & Infrastructure	196	489	462	13	17	143	1	13
Advisory (incl. B&C)	97	66	181	5	3	23	1	5
JESA Technologies	140	42	94	7	9	0	none	–

Billing PAs = people who issued invoices for the BU in the last 6 months (Water: Chaimae and Nouaman; AM: Abdelali and Malak). Mining is billed by the Fertilizers PA, JET by the Energy PA. JET unbilled is negative (credit notes) and shown as 0.

Proposed: seats sized on the BU, five Senior PAs, billing split by workload

Seats sized on the BU

Fertilizers (with Mining), Water, SP2M and AM each keep a dedicated seat; AM is led by Mohamed Ouarda with Yassine Taarabt as Senior PA. The four small BUs, Energy, B&I, JET and Advisory (1,030 MMAD revenue, 1,097 AR), form one cluster under Amine with Rabab as Associate FBP. B&I no longer has a seat of its own.

Five Senior PAs

Jihane Maddi (Fertilizers + Mining), Imane Naoui (Water), Khadija Moulaoui (SP2M), Oumaima El Hazgoune (small-BU cluster), and Soufiane Echchih as the fifth, kept on Water: largest revenue BU, 2,100 MMAD unbilled, and he also bills. Mehdi Baabo Ellah keeps his Senior PA grade and bills where the load is: Mining plus Fertilizers support.

Billing follows the workload

Projected load = 6-month run-rate + unbilled backlog over 12 months (slide 3). Fertilizers gets the only addition (Karim Nseri) and Mehdi's support; AM runs four PAs at about 67 a month each; Ikram takes Advisory next to B&I; Oumaima keeps billing Energy and JET. Hajar Aanaya becomes AR & Reconciliation Champion for all BUs.

Billing by BU: actuals, projected need, old gap and new gap

	ACTUALS · AR REGISTER, WINDOWS ENDING 31 OCT 2026								PROJECTION			TODAY		PROPOSED

Need FTE = (6-month run-rate + unbilled backlog ÷ average invoice ÷ 12 months) ÷ 60 invoices per PA per month. Invoices = distinct invoice numbers by invoice date. JET unbilled is negative (credit notes), shown as 0. Red gap = shortfall above 0.3 FTE, green = slack above 0.3 FTE.

OLD GAP · EACH BU BILLS ALONE

Old gap = Need FTE − PAs today

= 11.1 − 9.0 = +2.1 FTE

Shortfall (positive gaps): 4.5 FTE, in Fertilizers, AM, Mining, JET.

Slack (negative gaps): 2.4 FTE, in SP2M, Water, Energy, B&I, Advisory.

Not transferable today: no one owns billing across BUs, so the slack does not reach the shortfall.

NEW GAP · PROPOSED SPLIT

New gap = Need FTE − PAs proposed (FTE)

= 11.1 − 11.5 = -0.4 FTE

Shortfall falls from 4.5 to 1.0 FTE (AM +0.5, Water +0.2, Fertilizers +0.1, JET and Advisory +0.1 each).

Slack 1.4 FTE: Mining, SP2M, Energy, B&I.

FTE: Mehdi 0.5 Mining + 0.5 Fertilizers; Soufiane 0.5 Water; Oumaima covers JET; Ikram covers Advisory.

HOW THE GROUP TEAM CLOSES IT

Pool slack ≥ shortfall → 1.4 ≥ 1.0 FTE

Net after pooling = -0.4 FTE, i.e. 0.4 FTE of reserve

Under the AR & Reconciliation Champion the Senior PAs and PAs with slack act as one group team: 0.5 FTE to AM in peak months, 0.2 to Water, 0.1 to Fertilizers.

The reserve shortens the backlog conversion: at 12 months Fertilizers needs 2.6 FTE; the pool lets it run at about 10 months with the same people.
