Current organisation: eight FBP seats, support only on two, one BU without an FBP

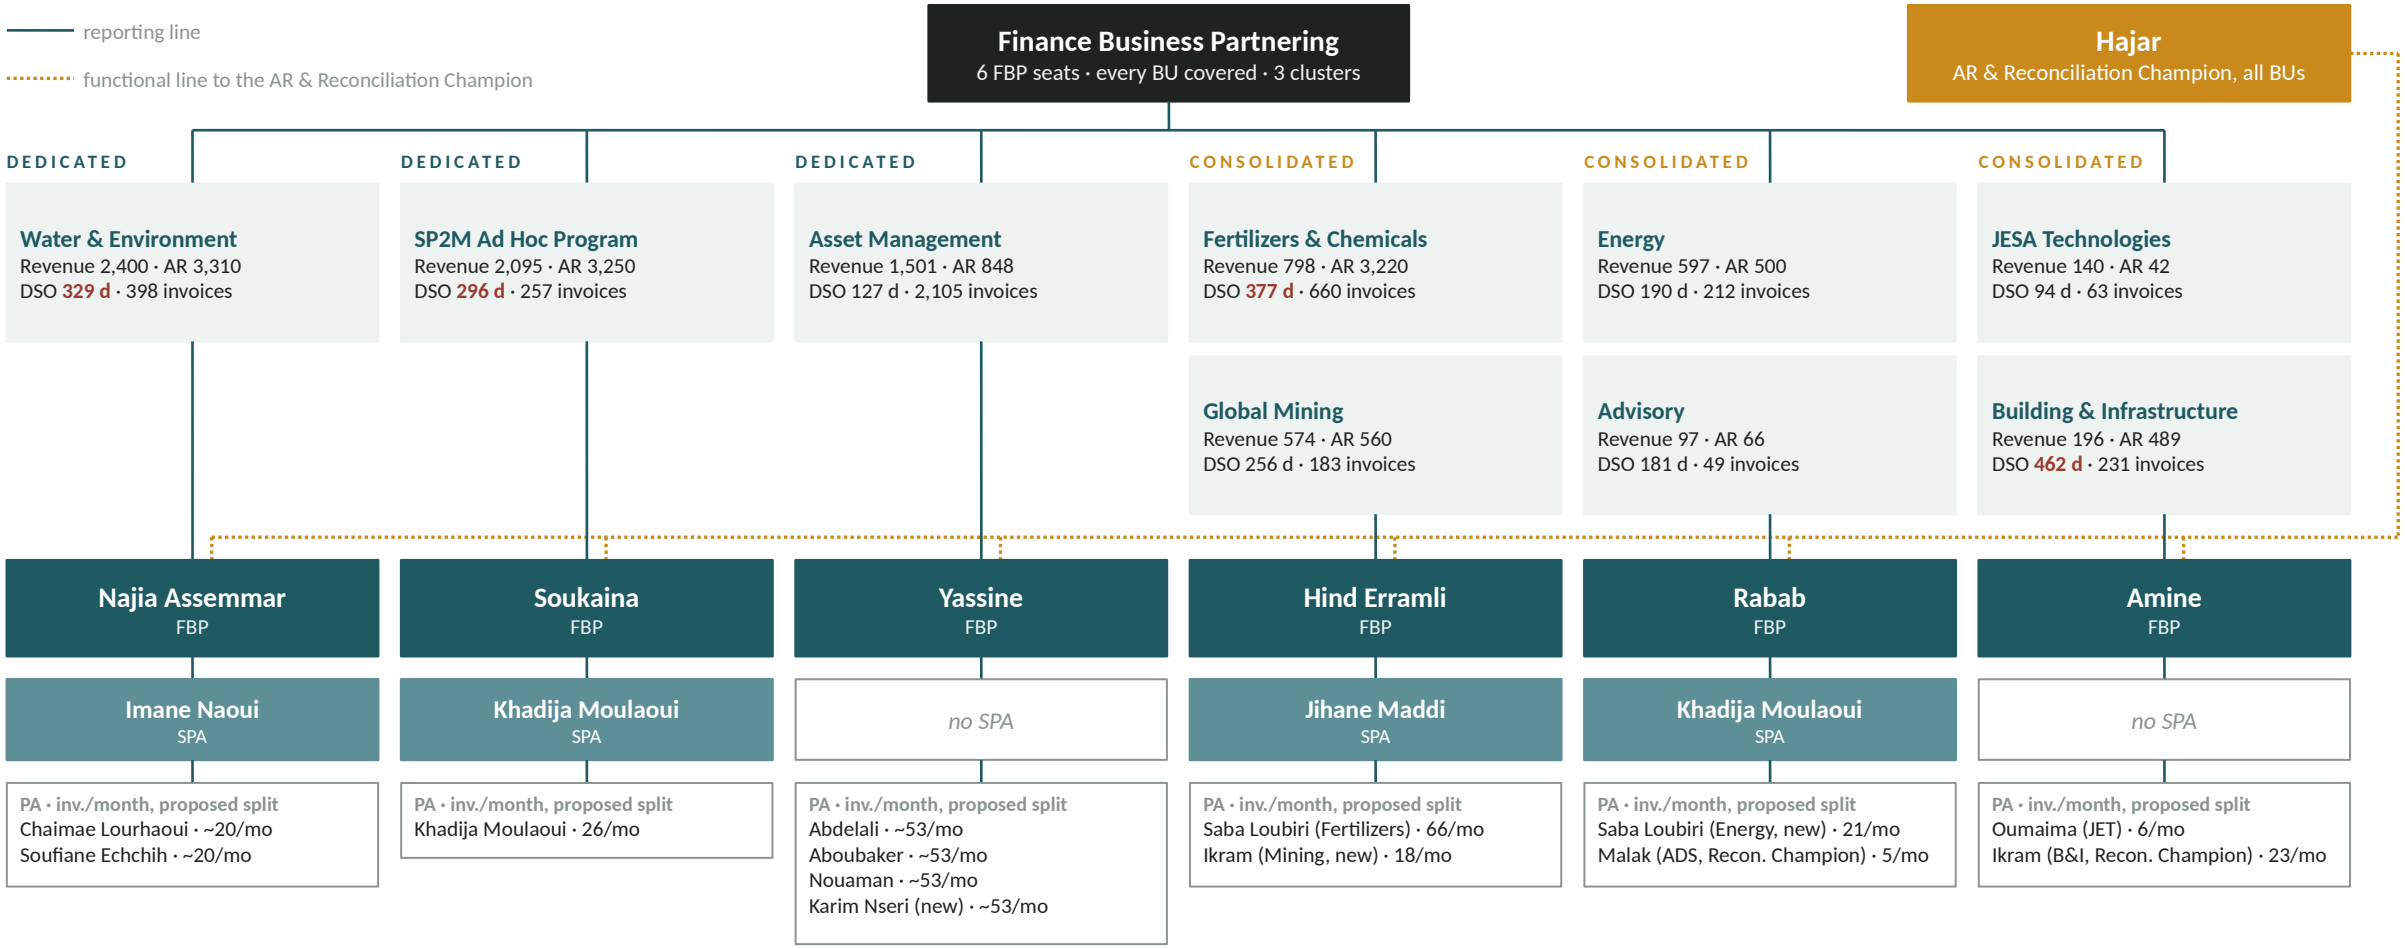

PA rates are actual invoices issued per month, Jan–Oct 2026 register. Three PAs on the org chart issued none; Malak issues mostly for AM and Nouaman for Water.

Five seats with no support
Energy, JET, B&I, Advisory and SP2M each run on one FBP with no SPA, and Advisory has no FBP at all. Only Fertilizers and Water have the FBP + SPA pair.

Invoicing borrowed across BUs
Mining, Energy and SP2M have no PA of their own. Saba Loubiri, Oumaima and Khadija Moulaoui invoice for them on top of their own BU.

AR control limited to one BU
Only AM has an AR Champion. Water, SP2M and Fertilizers, 9.8 bn MAD of AR between them, have none, and B&I and Fertilizers sit at 462 and 377 days DSO.

Proposed: dedicated FBP and SPA for the big BUs, the small BUs consolidated

Proposed rates: each BU's Jan–Oct 2026 monthly volume split equally among its assigned PAs. Totals per person: Saba Loubiri 87/mo (from 84), Ikram 41/mo (from 23), Abdelali ~53/mo (from 155), Malak 5/mo (from 62, her AM invoicing returns to the AM pool).

Size the support to the exposure

Water, SP2M, AM and Fertilizers carry 85% of group AR (10.6 bn MAD). Each keeps a dedicated FBP, and an SPA where one is named.

Consolidate the small BUs

Mining, Energy, JET, B&I and Advisory together are 1,604 MMAD of revenue and 1,657 MMAD of AR. Three clusters under one FBP and one SPA each replace five seats, and Advisory gets an FBP for the first time.

One line of control on receivables

The AR & Reconciliation Champion has a functional line to every FBP. Every BU has a dedicated PA, so the person invoicing is not the person reconciling.

JESA Group · Finance Business Partner team · KPIs: FY27 RFQ1 revenue and AR balance Oct-26 in MMAD, DSO excl. advances in days, invoices issued Jan–Oct 2026 · red DSO = above the 282-day group average
